

**From Brain Tumour Research Officer 105SC – Lion Sandra Manktelow**  
**Yearly Report 2020-2021**

To date clubs in 105SC have donated approximately £13500 for Lions Brain Tumour Research. The running total of donations from clubs in the Multiple District 105 is approx £57000. I would like to say a big thank you to clubs who have supported this worthwhile cause. We have a long way to go but I am sure that we will get to our target of £1million.

By Convention I will have made contact, either via zone or club meetings, with 49 of the 63 clubs in the District. I have been asked challenging questions from several clubs and have tried my best to find the answers to give them.

The Christmas card appeal went incredibly well and many clubs in our district supported this initiative. We sold out in early November and next year it is hoped that there will be more designs to choose from and the order forms will be circulated at an earlier date. This is a great way for individuals to support the cause.

Monthly newsletters have been sent to all clubs via the District Secretary informing them of national events that members can participate in.

I have attended monthly zoom meetings with the other Brain Tumour Research Officers to keep up to date with the progress of the appeal.

I have a number of Lions/Brain Tumour Research badges, based on the logo that can be procured for a suggested donation of £5.

If clubs wish to donate they can do so via our District Treasurer ensuing he knows that the donation is for Lions/Brain Tumour Research. If anyone wishes to make a personal donation please let me know and I will send them the details of how to pay.

If anybody needs support with anything related to the Lions/Brain Tumour Research partnership please contact me:
